Read the text and answer the questions from 1 to 4:

A student's daily routine typically starts with waking up early in the morning. They may have a set time to wake up, depending on their school schedule and personal preferences. After waking up, they usually get ready for the day by taking a shower, brushing their teeth, getting dressed, and having breakfast. Some students may prefer to wake up earlier to have more time to prepare for the day, while others may prefer to sleep in and rush through their morning routine.

Once they are ready, students usually head to school. They may take the bus, walk, or get a ride from a parent or guardian. During the school day, students attend classes, complete assignments, and participate in extracurricular activities. They may have breaks between classes or during lunchtime to socialize with friends or study. After school, students may have additional homework or study time before dinner and bedtime.

Before going to bed, students may have a bedtime routine that includes brushing their teeth, changing into pajamas, and reading a book, watching television or listening to music. They may also reflect on their day and plan for the next day. Getting enough sleep is important for students to be able to focus and perform well in school.
